New York, June 27.—There were hope and some expectation in the circles of professional operators in stocks that the new week's opening would witness an expansion of the dealings and a broadening of interest in the market. The market proved even more listless and sluggish than usual. Last week's hardening of prices and the good tone with which the light profit-taking at the end of the week was absorbed were the basis for hopes that the rising movement would grin force and attract ourside demands. A runming up of general conditions bore out some of the forecasts upon which it was supposed list week's rise was hased. But the new demand for stocks falled to develop and the disarpointment caused prices to drop after the opening. The later fluctuations were haguid and totally indifferent.

LOAN EXPANSION.

The heavy loan expansion by the banks hast week was a good deal discussed not withstanding the present redundancy of the money market. A desire is fest to know how far the expansion may be due to corporation borrowing, which would be regarded unfavorably, or how far to nake preparation for the usual balf year y and periodical astitements on Joly 1. amount of new wheat would come in before the latter part of July, traders seemed to be overcome by bearish sentiment in yesterday's market. Lack of outside interest was the main factor. At the opening there was some buying on reports of rain in many portions of the winter belt and higher cables. Liverpool's early advance was lost and only a few small shorts seemed to be on the buying side in the second hour. Large world's shipments for the week and a downward turn in foreign markets encouraged liquidation. New wheat received here and at Kansas City was disappointing in quality. Legitimate bullish conditions, such as a decrease in the visible supply and light primary receipts, were generally ignored because of the general belief that weather conditions would improve and the late progress of the crop would be rapid. It was, all together, a rather dull and listless market, with no interesting features.

Corn was on the downturn, despite light receipts and unfavorable weather. Large

world's shipments and weakness in other markets were the bearish indications. July wheat opened 1487sc up and closed 54c off.
